

# **ROBOT FRIENDS**

## **A Fun Guide to Understanding AI**

**By Darren W. Jones**

**Picture Book Sample Art**

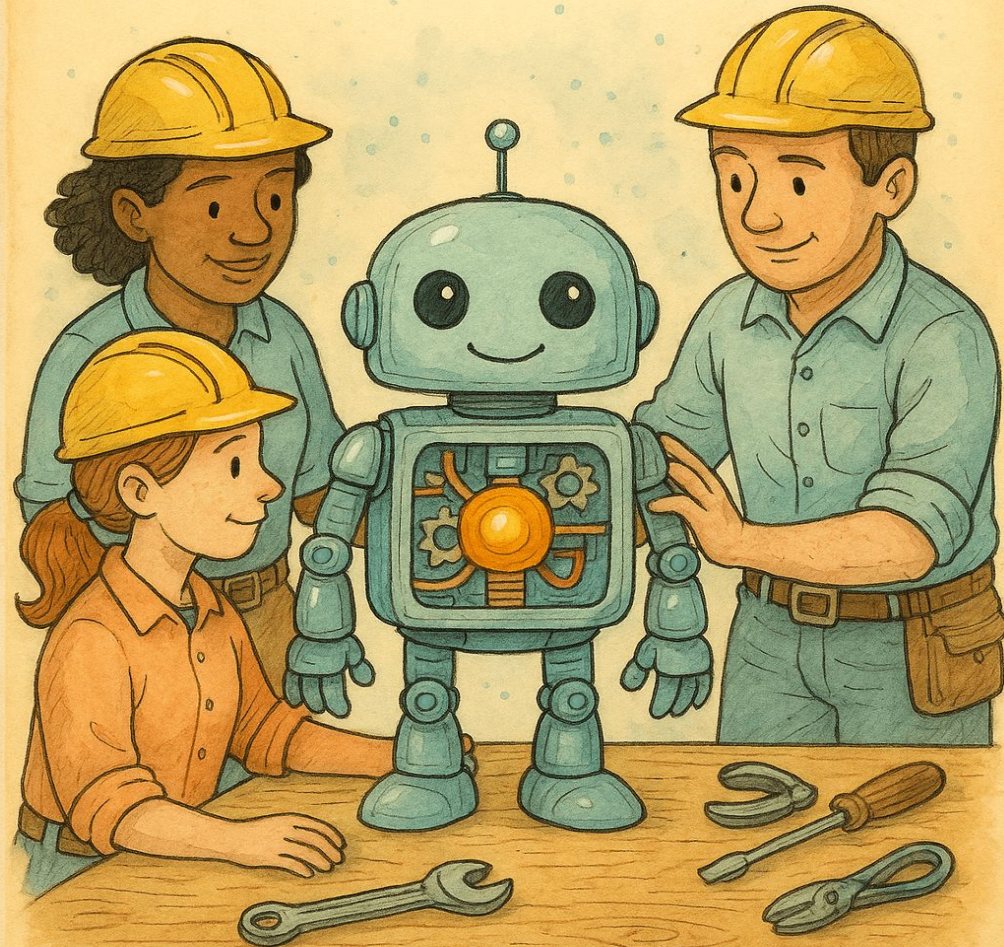

Who built these robot  
friends?

These are machines made by  
Engineers.

Engineers know how to build  
stuff.

They put the pieces together  
so it works.

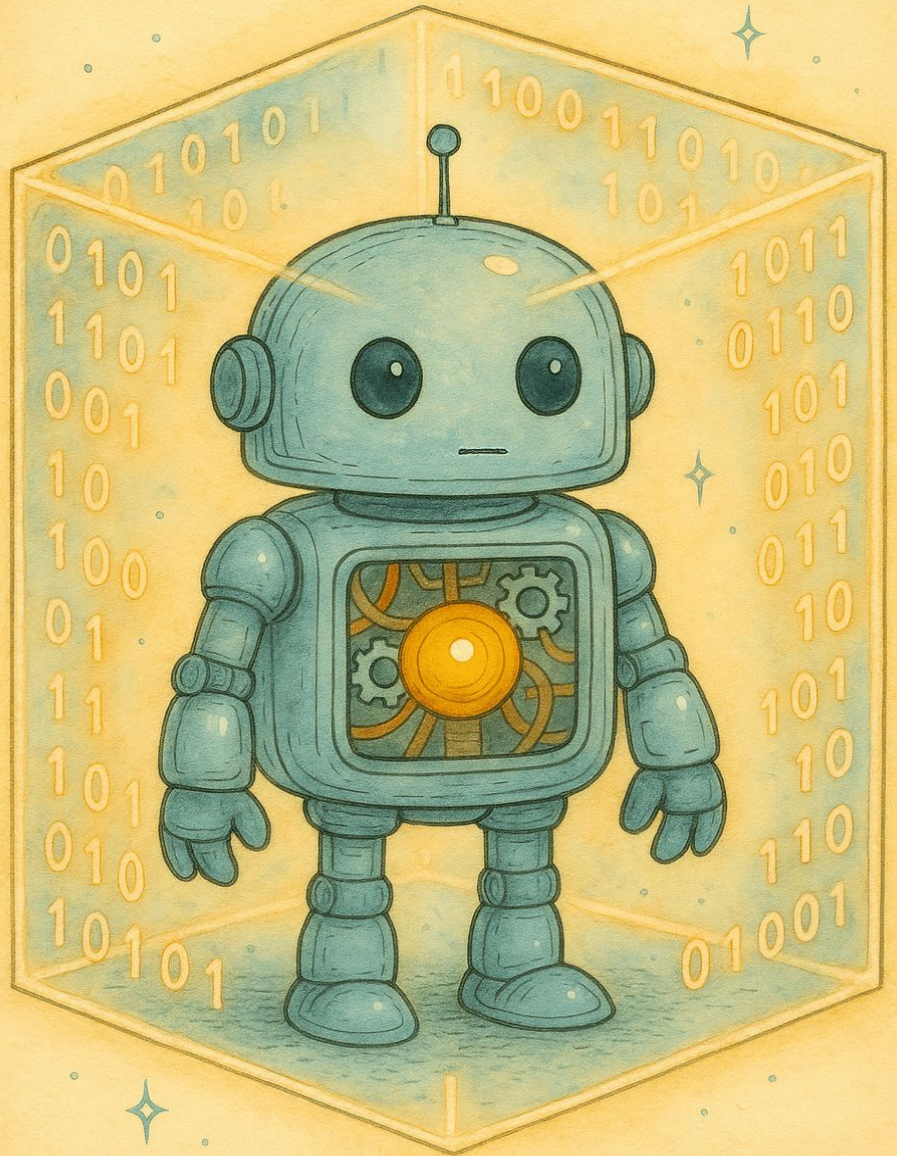

Bzzt-bzzt... Sproing!

**Why does AI make mistakes?**

**Because AI lives in a BOX.**

**Not a real box you can touch, but an invisible box made by those clever engineers.**

When AI tells you  
something, ask:

Is this true?

How does it know?

Should I check  
somewhere else?
